WORK EXPERIENCE

Ambassador
Tilt.com

06/2015 – 06/2016   *Tallahassee, FL*

Tilt is a technology company that makes it easy for groups and communities to fundraise securely and effectively online.

Achievements/Tasks

- Introduced and marketed the tilt mobile application on campus – establishing and engaging an active user base of 300+ users including multiple student organizations.
- Developed and managed numerous campaigns responsible for crowdfunding over $30,000.
- Recognized as a top 30 Campus Ambassador nationwide and top 15 Campus Ambassador in the south region for 2015 (1,500+ ambassador program).

Graphic Design Lead + Sales
Frattire LLC.

06/2014 – 05/2015   *Tallahassee, FL*

Established in 2011 to bring Better Quality, Better Service, and Better Value to the college community.

Achievements/Tasks

- Oversaw and performed design work for the company for over 50+ clients, locally and nationally.
- Personally generated design campaigns responsible for thousands of units in sales. Including numerous 200+ unit orders.
- Instrumental in client acquisition efforts both locally and throughout the state of Florida, with an emphasis on the collegiate demographic.

Sales and Marketing Internship
CTP Inc.

06/2013 – 08/2014   *Tallahassee, FL*

Providing Superior Products and Services to the Florida Power Industry Since 1991.

Achievements/Tasks

- Orchestrated email marketing campaigns to hundreds of prospects on a weekly basis.
- Assisted in the closing of dozens of orders, through weekly sales calls to established propsects.

SKILLS

`HTML` `CSS` `Git + Github`

`Javascript (ES5 + ES6)` `ORM & Activerecord`

`Rack` `Ruby on Rails` `React` `Redux`

`Sinatra` `SQL` `Adobe Illustrator`

`Photoshop` `Sketch`

PERSONAL PROJECTS

JetLog (07/2017 – 09/2017)
- Built out a Ruby on Rails API backend with PostgreSQL
- Established a cohesive UI utilizing the Material-UI Library
- Used React/Redux and front-end development tools such as Webpack, Babel, and NPM to create a Single Page Application to persist the Rails API for user engagement

Branch (04/2017 – 05/2017)
- Developed a Ruby on Rails backend from scratch, expanding upon previous version written in in Sinatra
- Integrated Devise and Omniauth Ruby gems to allow for streamlined user registration and sign-in/out functionality with Facebook
- Utilized Pundit gem to establish admin and user roles and authorize permissions accordingly

Billboard Top Songs (01/2017)
- Utilized Nokogiri to scrape Billboard's Hot 100 top songs list
- Developed a command line interface to allow the user to fetch and interact with data
- Published and maintained gem with 1000+ downloads to date
